

THE MOST SUSTAINABLE AND ENVIRONMENT FRIENDLY PROCESS FOR THE PRODUCTION OF OFFSET PRINTING BLANKETS USING “ZEROSOLVENT TECHNOLOGY”

*Acoprint is a complete range of
blankets manufactured by Acoma
Meticulously controlled manufacturing
process and superior dimensional stability*

*Exceptional consistency
from batch to batch*

*Precisely microground and polished
surface with excellent printing results*

*Superior quality of compressible layer
(closed cells) thanks to an innovative
and unique production process*

Extended durability

Outstanding price/performance ratio

100% Solvent-free production:
The true “green blankets”

***Innovation
and tradition***

The eco friendly blanket using “zerosolvent technology”

All-round blanket for a wide range of substrates and applications

Application fields: sheetfed, heatset, coldset

Resistant to conventional and hybrid inks

Low stretch carcass and available in 1,70 & 1,95 mm

TECHNICAL DATA

Colour	Light Blue
Construction	3 fabric layers
Compressible Layer	Closed cells
Nominal Thickness	1,70 mm / 1,95 mm
Thickness range	1,67 ÷ 1,71 mm / 1,92 ÷ 1,96 mm
Roughness Ra	According to application
Surface Hardness	60° Shore A
Hardness (total)	77° Shore A
Tensile Strength	> 75 Kg/cm
Elongation at break	< 4,5%
Compressibility	20-35 Kg/cm ² at 0,23 mm deformation
Application fields	Sheetfed, headset, coldset
Identification lines	Red+green
Ink compatibility	Resistant to conventional and hybrid inks
